***Reasons For Allowance***

The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The basis for the allowability is:

Prior art of record does not teach the combination of a first nitride/dielectric layer/second nitride stack formed in the trench, a recess large enough to place the collar oxide outside the trench, a trench shape that allows uniform LOCOS oxidation, a bird's beaks between the dielectric layer different from the nitride layer and the second nitride layer, the LOCOS oxide thickness being chosen to suppress vertical transistor region, doping bottle formation, a node dielectric layer, polyfill and poly recessing to create a position of a LOCOS oxide, a trench top oxide and a buried strap.

None of the art of record teaches nor suggests to combine above cited limitations in the claimed invention as a whole.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
